

达克罗链系列

Dacroment-plated chains

除不锈钢之外,最佳的耐腐蚀链条.

The best antirust chain except stainless steel chains .

特征

- 色泽:表面无光,呈白色
- 耐温:腹膜耐高温250℃
- 许容载荷:与常规链一致(强度比不锈钢链高,无电镀链出现氢脆现象)
- 耐磨性:与常规链一致
- 耐腐蚀性(与电镀链对比):

链条品种	耐腐蚀试验形式	耐腐蚀时间(小时)
电镀链	盐雾	48-96
达克罗链	盐雾	300-1000

FEATURE

- Color:lightness white
- Temperature tolerance:high temperature durability of the chain coat up to 250 ℃
- Allowable load:same as normal chain(higher strength than stainless steel chain, no hydrogen brittleness like electroplate chain)
- Wearability:same as normal chain
- Antirust compare with electroplate chain:

ITEMS	ANTIRUET TEST METHOD	DUARABLE TIME(HOUR)
ELECTROPLATE CHAIN	SALT FOG	48-96
HIGHGUARD CHAIN	SPRAY	300-1000
